

ISABELLA FELACO

San Francisco Bay Area | isfelaco@gmail.com | isabellafelaco.com | github.com/isfelaco | linkedin.com/in/isabella-felaco

Software engineer specializing in TypeScript and React, with experience owning critical frontend systems end-to-end. At OpenGov, led the redesign of core form-rendering infrastructure and shipped high-impact features supporting multi-product workflows and large customer contracts. Currently engineering seamless, high-impact AI-native interface experiences at Distyl AI. Focused on building scalable, reliable user-facing systems.

SKILLS

- **Languages:** TypeScript, JavaScript, Python
- **Testing:** PACT, Playwright
- **Styling:** CSS, Bootstrap, MUI, Styled Components
- **Frontend:** React, Next.js
- **State/Data:** TanStack/React Query, Redux
- **Backend:** Node.js, Express, Django
- **Databases:** SQL

EDUCATION

UNIVERSITY OF VIRGINIA
B.S. in Computer Science

2020 - 2024

EXPERIENCE

FRONTEND PRODUCT ENGINEER | Distyl AI

May 2026 - Present

- Turn client-provided mocks into polished, production-ready UI, including a demo for a ~\$3M Fortune 50 contract pitch built around a single-screen workflow, bulk operations, and pre-written escalation emails.
- Reimagine feedback UX to collect ground-truth data on 300+ contracts, used to iterate on and improve a contract extraction system.

SOFTWARE ENGINEER II | OpenGov

March 2026 - May 2026

- Served as subject matter expert for the forms system, leading redesign to private preview for 5 customers during org transitions.
- Implemented performance optimizations (lazy loading, virtualization) to scale the system for general availability.
- Improved accessibility of core features to meet A11y compliance standards.

SOFTWARE ENGINEER I | OpenGov

June 2024 - March 2026

- Led frontend redesign of the application's form-rendering system as primary frontend engineer, authoring architectural documentation adopted by the team.
- Delivered a critical security feature under a one-month deadline supporting a \$5.9M contract with the City of San Francisco.
- Maintained and extended a shared frontend library used across multiple products and teams.
- Introduced contract testing (PACT) to improve integration reliability and prevent regressions.
- Investigated and resolved 30+ customer-reported defects across multiple services, improving system stability.
- Contributed to redesign of the form builder, including development of a new AI-powered feature.
- Partnered with customer success teams to validate feature parity and ensure new functionality met real customer needs.
- Created onboarding documentation and improved repository READMEs to streamline developer onboarding.

SOFTWARE ENGINEER INTERN | OpenGov

May 2022 - June 2024
